

First Aid

If a worker is injured and unable to walk to the First Aid Room

1. Safely proceed to the nearest Air Horn & Portable Fire Extinguisher (PFE) Station.
2. Sound the First Aid Alarm by making 3 short blasts of the Air Horn, repeating at regular intervals, until a First Aid Attendant arrives.

3 SHORT BLASTS = FIRST AID

(approx. 2 seconds per blast)

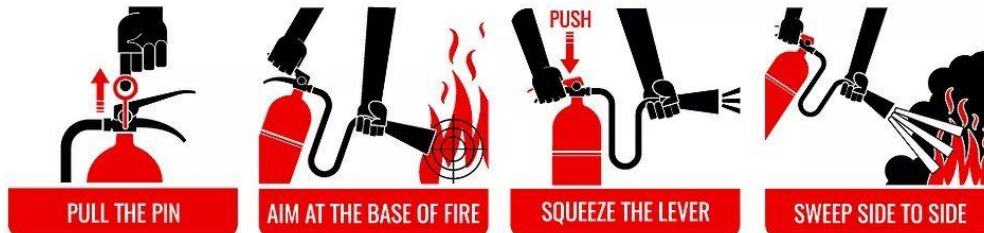

Fire or Evacuation

If you discover a Fire

1. Safely exit the area and proceed to the nearest Air Horn & PFE Station.
2. Sound the Fire or Evacuation Alarm by pressing and holding the trigger on the Air Horn. Empty the Air Horn to ensure the maximum notification is given.

1 LONG BLAST = EVACUATE (Fire)

3. If you are not in danger, use the PFE to attempt to extinguish/control the fire.

4. Proceed to the Marshalling Point and cooperate with Site Supervisory Staff & Emergency Response Personnel.

If you hear the Fire and Evacuation Alarm

1. Stop what you are doing.
2. Proceed immediately to the Marshalling Point.
3. Check in with your Supervisor so they know you have safely exited the building.
4. Remain at the Marshalling Point until released by Site Supervisory Staff or Emergency Response Personnel.

The Site Superintendent or designate will contact Emergency Response Personnel.

Dial 911 and report your emergency
