

First Aid Flowchart

A **Medical Aid** is any injury or condition that is:

- in the Rapid Transport Category
- required to be referred to medical treatment as per the OFA training manual
- otherwise beyond the scope of training for a First Aid Attendant to treat, with the exception of recommending a tetanus toxoid injection (immunization).

Transport Decision
 Ambulance, Taxi,
 Company Vehicle, or
 Personal Vehicle

If the worker chooses to go home instead of to medical aid, **Notification** is still required.

Provide **Notification** of the incident to the

- Construction Manager
- Safety Manager
- [and WorkSafeBC ??]

Incident Notification on PolyNet

First Aid Record
 See OHS Guideline G3.19 for acceptable record-keeping practices

OHS Guideline G3.19

Return to work
 [modified duties?]

If the worker chooses to go home instead of returning to work no further action is required.
